

Dec Group establishes new subsidiary for Japan

news-releases Dec Group

November 13, 2024

Ecublens, Switzerland: – World-leading materials handling and end-to-end process solutions provider Dec Group has inaugurated a new subsidiary to serve the huge Japanese pharmaceutical, biotech and life sciences market.

Dec Japan is based in Tokyo and will allow Dec to raise its local brand profile, engage more directly with Japanese customers, respond to specific client needs, and provide tailored solutions that meet local demands and generate increased business.

Newly appointed Japan Business Developer Kenichi Yoshida commented: “This milestone not only strengthens our presence in Japan but also gives us the opportunity to cultivate a strong brand identity that enhances trust and credibility among our clients and partners.”

Kenichi was formerly the Project Manager specializing in Dec Group products and technologies with long-time local partner Higuchi Inc.

Continued collaboration

Higuchi has been Dec’s representative in Japan since 2001 and will continue to collaborate with Dec Japan on certain technologies.

Dec Seminar 2023

Poland, 6 – 8 September

Mr. Yoshida added: “We are also particularly pleased to continue our business relationship with our esteemed partner Higuchi Inc. We sincerely appreciate their valued collaboration over the years and look forward to many more successful ventures together.”

About Dec Group

Founded in 1987, Dec Group is a Swiss based leading global provider of powder handling and process containment systems to the pharmaceutical, chemical, food and cosmetic industries.

Dec products offer a high level of safety for both operator and product. Their advanced system concepts, from the standard powder transfer system to highly complex integrated handling and processing equipment, allow clients to increase productivity while respecting current legal requirements.

Over the past years, Dec Group has carried out a significant expansion of its activities with the acquisition of specialized companies. The company today has divided its products into 5 distinct divisions: Powder Handling, Continuous Processing, Particle Sizing, Containment Solutions and Filling Solutions offering true end-to-end solutions from the raw material input to the final dosage form.
