

## Dec Group to highlight leading edge fill-finish line design at Pharmaceutical Aseptic Processing Virtual Forum

News Release March 25, 2021

Ecublens, Switzerland: – Dec Group (Dec) will be a prominent presence at the upcoming Pharmaceutical Aseptic Processing Online Forum 2021, where it will provide insights on designing Aseptic Filling Line for Powders and Liquids in Dual Chamber Syringes.

**Dec is a silver sponsor of the event and was also closely involved in last year's HPAPI conference from the same organisers.**

### Aseptic Fill and Finish design

Dec will contribute a technical presentation with its Managing Director Frederic **Dietrich speaking on a 'Global Approach to design an Aseptic Filling Line for Powder and Liquids in Dual Chamber Syringes,' viewable from 1145hrs CET (UTC+2) on May 5, Day One of the forum.**

His presentation will cover trends for new delivery systems for parenteral administration, the most accurate microdosing technologies, and the challenges of maintaining sterility and containment throughout the whole process.

### Pharmaceutical sterile manufacturing

Dec Group has become a leader in the design and manufacture of pharmaceutical sterile manufacturing solutions, having developed unique concepts to link the various process steps in a total contained way, based on its PTS Powder Transfer System®, combined with isolator, blending and micronizing technology.

**Dec's experience lies in offering tailored solutions for automatic filling of various packaging such as vials, pouches, syringes and blisters, with dosing systems that are fully incorporated into process lines.**

### **About Dec Group**

Dec (Dietrich Engineering Consultants) Group is a leading global provider of contained powder handling systems and is recognized as a world-leading expert in process containment technologies. It has been supplying the pharmaceutical, chemical, food and cosmetic industries for more than 30 years.

Headquartered near Lausanne, Switzerland, Dec Group has a global presence with subsidiaries and agents in more than 30 countries including subsidiaries in the UK, Ireland, Germany, Poland, the Netherlands, India, China and the USA. In excess of 600 companies worldwide have successfully integrated more than 9,000 Dec systems into their production sites. These include a wide range of patented products that enhance safety, hygiene, containment, reliability and productivity in powder handling.

Dec offers innovative approaches across the range of powder handling and process containment applications, including transfer, micronizing, filling/emptying, sampling, blending, dosing, aseptic solutions, milling, isolators and advanced cleaning (CIP/SIP) features.
