Transferring · Dosing · Seeding SCC Single Charge Container

- · SCC combined with PTS Powder Transfer System® for safe reactor charging or any other powder conveying application
- · Ideal for the introduction of small quantities of catalysts, additives, etc.
- · High containment no opening during the process
- · No risk of contamination

- · Oxygen exclusion by PTS
- · Process isolation, safe charging independent of reactor conditions
- \cdot 100 % discharge due to PTS suction
- · Typical size of volume 1 10 l
- · CIP
