

Following recent acquisitions, Dec Group continues to accelerate its growth and expands its product range, particularly in the field of aseptic and containment filling lines and Isolators. As a leader in the design and production of powder transfer, handling and containment equipment for pharmaceutical and Chemical industries, Dec Group offers global solutions throughout the production chain from the raw material handling to the final product packaging process. The group has more than 950 employees worldwide, including 120 employees headquartered in Switzerland.

For our office in Breda Netherlands we are looking for a:

Lead Mechanical Engineer (M/F) – 100 %

Mission

As a Lead Mechanical Engineer, you are responsible for the design and technical analysis of mechatronic equipment solutions. You come up with effective and efficient solutions, within the agreed time frame. Taking full ownership of your assignment and communicate clearly with the Project Managers and other involved disciplines is key. You will have an important role in multidisciplinary project teams, and other disciplines.

Your role

As Lead Mechanical Engineer you are responsible for:

- Contribute to risk assessments from a design perspective and provide input to Project Managers.
- Generate effective and efficient ideas and solutions within the agreed timelines.
- Perform engineering calculations such as stress analyses and structural design calculations.
- Taking full ownership of your assignments and maintain clear communication with Project Managers and other involved disciplines.
- Collect data, prepare reports and evaluate results.
- Review blueprints and design documents to ensure they meet customer requirements and industrial standards.

You will play a key role within a multidisciplinary project team that includes mechanical, electrical, and software specialists. Mechanical Engineers will support you in detailing your designs, clear communication is essential throughout this process. But it is also important that you provide technical leadership and guidance to grow our technicians.

This position occasionally requires domestic and international travel for on-site project analysis. In short, you will be involved in product development from concept through to a fully functional product.

This role offers an excellent opportunity for both personal and professional growth.

What Dec has to offer

Working at Dec means being part of an ambitious and innovative organization. We value quality, teamwork, an informal atmosphere, personal connections, and building lasting relationships. Our line of work offers high-tech challenges that encourage creative thinking and the development of groundbreaking solutions.

In addition to a competitive salary and benefits package, we offer continuous opportunities for learning and professional growth especially in what you enjoy most: solving technical challenges.

Your profile

- Bachelor's or Master's degree in Mechanical Engineering, Mechatronics or a related field
- High-tech equipment mechanical design and engineering
- Sterile / Hygienic design knowledge is a pré
- Proficiency in 3D CAD software; Inventor
- Strong problem-solving skills and the ability to work in a dynamic team environment.
- Excellent communication skills
- Knowledge of materials and manufacturing processes
- Knowledge of:
 - Risk Assessments (DFMEA & CE)
 - Handling systems
 - Dynamics
 - Robots
 - Automated equipment
 - Interest in complex systems
