PTS Powder Transfer System®
SIP Version

New Aseptic Design (SIP) including CIP Cover

PTS Powder Transfer System® is an exceptionally effective and reliable method of transferring and dispensing both dry and wet powders and granules. To better meet the increasing demand in aseptic production, Dec has improved the SIP version of the PTS Powder Transfer System®.

- Sterilizable valves (diaphragm, butterfly valves)
- Greatly improved hygiene, no dead space, no grooves
- Temperature and pressure sensors (sterilization 120 °C)
- Control/display by HMI touch-screen
