

## News Release

### Dec Group brings advanced micronizing solutions to INTERPHEX 2017

Ecublens, Switzerland: –Dec Group, will return to the high-prestige INTERPHEX expo in New York to showcase its new 4th generation jet milling product line. The Dec stand at booth number 2571 will further showcase the group’s solutions based on its pioneering PTS Powder Transfer System for safe powder conveying. These are led by the PTS Batchmixer and the high-containment powder filling equipment DCS (Drum Containment System) for filling drums and big bags.

#### PTS in action

Dec will demonstrate PTS Powder Transfer System with its unique filtration system in action, along with PTS Batchmixer high containment powder mixer. The Dec team will include powder handling and containment solutions experts to provide direct answers and advice.

“At INTERPHEX 2017, we are reaching out to a highly expert audience of pharmaceutical manufacturing professionals, decision makers, process engineers and buyers for whom high containment throughout the manufacturing process is critical for working with highly potent active pharmaceutical ingredients (HPAPIs). Dec Group can provide high containment solutions without the need of cost intensive clean rooms and yet assure absolute safety when it comes to critical powder handling or conveying,” said Dec Group Marketing specialist, Gabriela Mikhael.

#### 4th generation jet milling product line

The patented 4th generation handles very sticky and fine powders. It has been optimized to achieve outstanding results in terms of narrow PSD (Particle Size Distribution). The kinetic energy being concentrated on a smaller section area allows generating finer particles. The jet mills of the 4th generation are also easier to assemble and to clean.

“Dec Group jet milling systems are widely respected in our market for their superb engineering, flexibility and advanced micronizing capabilities,” said Gabriela Mikhael.

“More than ever, DEC is the leading single source provider for complete solutions including safe powder conveying via PTS,” noted Ms. Mikhael.

Dec is accepting meeting requests via the contact and INTERPHEX registration system links below.

## About Dec Group

Dec (Dietrich Engineering Consultants) Group is the leading global provider of contained powder handling systems and is recognized as a world-leading expert in process containment technologies. It has been supplying the pharmaceutical, chemical, food and cosmetic industries for 30 years.

Headquartered near Lausanne, Switzerland, Dec Group has a global presence with subsidiaries and agents in more than 35 countries including European subsidiaries in the UK, Ireland, Germany and Poland, together with Asian offices in India and China, and a North American subsidiary in New Jersey.

In excess of 200 companies worldwide have successfully integrated more than 4000 Dec systems into their production sites. These include a wide range of patented products that enhance safety, hygiene, containment, reliability and productivity in powder handling.

Dec offers innovative approaches across the range of powder handling and process containment applications and supplies the industry with an extensive line of powder handling and process isolation equipment including transfer, filling/emptying, sampling, micronizing, mixing/blending, dosing, aseptic solutions and advanced cleaning (CIP/SIP) features.

## About INTERPHEX 2017

After 38 years, America's International Pharmaceutical Expo (INTERPHEX or IPX) has become one of the world's leading single source events for biopharmaceutical and pharmaceutical manufacturing and processing solutions and technologies. The Expo aims to showcase the full range of state-of-the-art solutions needed for cost-effective product development and manufacture, including equipment, accessories and technologies while offering networking and peer-to-peer sharing opportunities, presentations and interactive demonstrations.

INTERPHEX 2017 is a three-day event opening March 21, once again at the Javits Center in New York City featuring more than 620 vendors and is expected to attract some 10,500 pharmaceutical and biopharmaceutical industry professionals.

IPX is organized by Reed Exhibitions with more information at: <http://www.interphex.com>
